Subject: Abortion Law Reform
Date: Monday, 27 June 2016 10:04:03 AM

I tender my Submission based on the following points,

Human life is deserving of protection , hence the laws we have in this country to protect human life.

Unborn infants are vulnerable and we need to provide that protection. It appears that abortionists wish to perform abortions up to full term for any reason! It is for this reason they must be regulated.

I believe the current situation works well, though through my experience with those who have had abortions leads me to believe no abortion would be preferable.

Once conceived there is life, this life and its rights to life should be the overriding factor in regards to the “perceived rights” of other parties.

Please consider this before making changes as outlined in the amendment bill.

Byron Martin
