---

Good afternoon,

We find it hard to fathom, how this Bill that does not have any safeguards, or does not protect life has come to be put towards Parliament.

Thought this nation was for:- Saving lives!

Protecting human life in its most vulnerable form!  
Providing help to those who find themselves with unwanted pregnancies by way of financial, emotional and physical support so that both Mother, Father, and Child are helped and can survive can move forward to live, and achieve all that they have been naturally gifted to achieve in our community!

Has anyone considered the cost of providing help as mentioned above along with promoting adoption to married couples that cannot have children versus the cost of the IVF program.

Or our need to increase our population this way versus immigration.

Please vote for the lives of the next generation and stop this Bill and any other that would deny life to the unborn child...

Many Thanks for your time in reading and for your effort to support life!

Kind Regards

Kerry Wood (Mrs)
