Subject: Proposed Abortion Law - Queensland
Date: Monday, 27 June 2016 5:55:48 PM

Dear Members of the Queensland Parliament,

This email is to voice my horror at learning that Queensland contemplates legislating to bring it's state laws into line with Victoria's atrocious law on this matter.

It is many decades since it was possible for any reasonably well informed person to assume without insincerity the position that a child is ever not a distinct individual, distinct from both of his or her parents. The child's unique constitution had been established before the child ever attaches parasitically to his or her mother. That the child is in fact parasitic at one stage of life is nothing to the point. Yet the mainstay of the abortionists' position is that *there is no human individual there*, parasitic or otherwise, *distinguishable* from the mother.

It is not appropriate to further rehearse here information that has been amply disseminated over the last half century and longer.

I simply repeat that it is horrifying that Victoria's lead might be followed.

Yours very sincerely

Kendrick Pereira
