**Two articles greeted me this morning on my computer.**

**1. An American man who left his six month old baby girl in a hot car and then put her in the fridge. She was dead. She died alone.**

**Just as the 27 babies talked about below died alone.**

**2. Abortion Law Reform (Woman's Right to Choose) for QLD**

Did you know that 27 babies were born alive during [late-term abortions in QLD](#) in 2015 and left to die left unattended.

The differences between these two tragic stories is the father didn't mean to kill his baby girl and there will be consequences.

Unlike the 27 babies who where meant to be killed but no one is accountable for their deaths and there are no consequences for their killers.

My point..... you know it already.

Your very concerned and more than a little upset constituent.
