Hi, Im Tai,

Im contacting you regarding the new abortion law that is being considered "womens Right to Choose" and i would like to argue against it.

So basically the law would allow women who are pregnant at 9 months to have an abortion if I'm not mistaken, and I cannot even begin to argue how wrong that is. That is a fully grown baby, that the doctors would rip apart. What does it matter if the baby is born yet or not. Its a child.

In fact, its not a womans right to choose at all. the baby isn't a body part but is a completely different human all together. If we continue to let these increasing laws of acceptance overcome our country, Such as abortion, who knows what our country will look like in 100 years.

The thing is, You are in a position of power. And the choices you make regarding abortion will have a tremendous impact on our society. will murder be legal soon after?

There is no reasonable argument for the killing of a child. No matter what. the 2 month old baby is just as defenceless as the 9 month old baby. Shouldn't we be seeing a law to protect these children rather than devouring them at abortion clinics? This is a very sick practice.

Who Gave you the right to judge wether someone is worthy to live or to die? that sounds like some nazi Germany excrement to me.

Just like pro choice people. Adolf Hitler also argued that the Jews were not human. He too Killed defenceless and innocent people. Will we look back at this in 100 years and frown as we frown at the holocaust. I plead with you. You have been given the authority to ultimately change the way society thinks. If you mess this part up, You will be part of something horrifically evil.

So please turn from this law and cancel it while you still can. What Would God Say?
