Name: Amanda Excell

I would like to submit my objection to the proposed abortion law reform bill in Parliament at the moment.

I believe it to be counter productive to the issues faced by pregnant woman facing challenging and/ or difficult pregnancies. Through our work with these at risk mums in the age bracket of 24-35, the reason most choose abortion is lack of support.

As a community we are growing further apart. This lack of connection is driving the feeling of isolation and heightening the fear of challenges.

If the government were serious about **HELPING** women they would work towards creating more opportunities to support women in at risk situations.

Please vote **NO** to the abortion law reform. It matters to those whose lives are at risk!
