Parliament House
Brisbane

Dear Sir

I understand that the Qland Parliament is to consider and debate a proposal put forward by a N.Q. M.P. that the practice of abortion should have no restrictions - rather that those responsible should be allowed "open slather" in this abominable practice.

This form of medical intervention appears, to me, to be no different to that which the late, infamous Dr. Mengele practised in Nazi death camps. It is little more than a sophisticated form of murder, in most cases.

Some years ago, close friends were strongly advised (badgered?) by medical authorities to abort the mothers growing fetus because the expected child could not possibly survive to live a productive and useful life. Today that baby is now a healthy and brilliant aeronautical engineer and living a good productive life.

I have read so many well researched horror stories of the grief and anguish of mothers who have surrendered to the pressures of sociological "political correctness" and aborted their child - and then spent decades in bitter regret for having, at a time of emotional trauma, done so. Sadly they cannot "turn the clock back" and a life has been snuffed out - for what valid reason?

May I quote to you from the book of Psalms (94)?
"Can wicked rulers be allied with you,

Those who frame injustice by statute?

They band together against the life of the righteous
and condemn the innocent to death."

I submit my strong opposition to this proposed legislation
