Dear MPs,

I am a voting resident of Queensland and I am vehemently opposed to legalising abortion in Queensland. How is it that the basic rights of a mother are protected but the basic rights of her unborn baby are taken away from it if the baby's mother chooses? How is it that if a mother did this to her born baby she is charged with murder but if her baby is still in her womb then it's ok? How is it that if a doctor kills an unborn baby that is "wanted", that doctor is charged with murder or manslaughter and his license revoked but if the mother says she doesn't want her baby, then it's not murder? These laws contradict each other! We can't pick and choose! This someone's life! How is it that Australia is supposed to be an advanced nation, yet we are murdering the very small & vulnerable by the thousands every week? These are heinous laws & I will not vote for any member of parliament who supports abortion. We need to support women with unwanted pregnancies so they can have their babies safely. We also need to provide simple adoption procedures if needed. Abortion harms women and their babies. The women live with the regret and guilt their whole lives. How can anyone offer murder as a solution?

Regards,

Melissa Sturt
