Subject: Abortion Law Reform Proposition for Queensland
Date: Wednesday, 29 June 2016 10:26:24 AM

To the members of the Health, Communities, Disability Services and Domestic and Family Violence Prevention Committee for consideration.

Submission for your consideration from;
Ian Dyer,

There may well be some need for changes to the laws regarding Abortion but the bill introduced by MP Rob Pyne, "**The Abortion Law Reform (Women's Right to Choose) Amendment Bill 2016**" most certainly **should not** be implemented as it goes to far.

There is **a growing shellfish move in society these days to promote the individuals, so called rights, above those of others.** Of course women, "mothers of un born babies" have rights, as do the fathers and of **equal and paramount importance so does the un born baby** who needs protection from its mother who wishes to terminate their life.

It is well known that babies are born some times many weeks early, either naturally or by caesarean birth, and grow to adult hood. They must be given the opportunity to live not be killed.

Please consider this. Had **your mother been able to terminate your life** before you were born what would be the consequences. You would be deprived of your free will to enjoy this wonderful life you have been granted, given. You would not be able to contribute to society as you do now and enjoy the love of others and if you chose to have a family, your children would never be born, your grand children and great grand children would not exist. None of these people would have been able to contribute to their families and society. **You personally would not be able to give this bill** the due serious consideration it deserves.

I believe it is of paramount importance that the unborn be given the full protection of our law. I believe that your

Health, Communities, Disability Services and Domestic and Family Violence Prevention Committee must support

the unborn and protect them from family violence all be it wrapped up in present selfish wording and clinically done by others. Un wanted un born babies have the right to life, be adopted and brought up in a in loving, natural family where they can develop normally among women and men and enjoy their own rights as a living person.

Health professionals should morally be able to abstain from being involved in abortions.

I would respectfully ask that **this bill be dismissed.**

Ian Dyer
