Subject: Abortion or failure to maintain life?
Date: Wednesday, 29 June 2016 2:06:17 PM

Do we want to be known as a State that turns a blind eye to murder? After all don't doctors take an oath to preserve life?

How is it that many abortions result in live-births which are then terminated. What is that? This is happening even before any legalisation of abortion law has been passed. We need politicians with upright morals and intestinal fortitude to go against the vocal minority trying to assert the rights of women over the lives of helpless babies whether born or still in the womb.

Allow Life, especially that of persons without a voice, to be a priority when deciding on legislation giving those with the power, the right to kill.

Marie Smrek
