This Bill is quite simply evil. What on earth has become of our society when a bill like this which envisages a "right" to kill unborn babies from conception to death as being not only morally acceptable but even desirable?

A human foetus is by definition human from the moment of conception. It is self-evidently wrong to kill the most vulnerable and innocent members of our society for any reason.

The end cannot justify the means.

This bill should be comprehensively rejected.

David P Ollerenshaw (Dr)
