Subject: Thet have a silent voice please don't allow this Bill to be passed Please
Date: Wednesday, 29 June 2016 10:54:45 PM

Dear Sirs/Madams

Decriminalising abortion will i believe increase abortions in Queensland. This has already happened in Victoria.

Abortion is murder no matter how it is covered. A friend had an abortion and after the abortion she found it hard to forgive herself because she realised that she had terminated her own child Before she did it everyone was saying that it would be ok that it is just tissue but she knew that once the baby had been aborted that something inside her had died She became depressed and with drawn Abortion causes death to the baby and harm to women. This bill is extreme there are no offers of limits on gestation.

Why is there no guidance counselling and help for expectant mothers and why are fathers not given a voice they have given 23 of their chromosomes towards the creation of their child. They aren't there more adoptions of local babies that appears to be virtually non-existent because of the number of abortions

Myths that late term abortions do not increase each year well in Victoria, since decriminalisation in 2008 late term abortions have increased.

Myths that late term abortions are just for babies with congenital abnormalities well in Victoria late term abortions for psychosocial reasons are responsible 50% of the late term abortions.

Why is the Bill being brought up before Parliament have the constituents asked for this or is it being orchestrated by Parliament itself .

Why is this happening. Its bad enough that abortions are happening at 20 weeks how can it not be murder at 40 weeks. Many women have premmie babies that live so how can you say this is not murder if a baby is terminated at 40 weeks . Passing this Bill I believe is morally and ethically wrong . This is like allowing terrorist to come and mutilate you cut out your baby, I'm sorry this is inhumane.

It's wrong and nothing you say will make it right. The facts speak for themselves. Please take off the blinders and see that what this Bill is wanting to achieve is morally very wrong. How can we be shocked at what ISIS does and then turn around and see nothing morally wrong in aborting a near full term baby. Surely there are other more pressing Bills that are needed rather than this one.

Respectfully

Liliana Medhurst
