---

I believe that abortion should be a medical issue decided between a woman and her doctor. I believe that exclusion zones should be provided for around abortion clinics to prevent harassment by people intent on shaming others for their choice. I believe that the best way to prevent abortion is by proper scientific sexual education to young teens with the discussion of all types of family planning and consent. I believe that if religious people don't agree to abortion that they should not have abortions, but that their religious views should not trump another human's right to bodily autonomy.

Regards,

Joe Bette-Bennett
