To Whom it May Concern,

I do not wish this horrible idea to take root in our laws.

When is a child a child.....at what stage of development is an unborn child a baby??

Could it survive outside of the womb if you did not take it's life. Why is the unborn child's life not of value.

What do we call mothers who terminate their live new born babies, who are we to play God with human lives.

your sincerely

Glenda Riddell

(Mother of five and yes I had one that I considered aborting at week 8 as an unmarried single girl, I didn't - and he is a wonderful young man.)
