My loyalty is to the Hippocratic Oath which has stood the Test of Millenia.

The Oath prohibits:-

[1] Seduction of males or females, and not just the patient but everybody in the patients house

[2] Abortion which many use as a solution to a seduction gone wrong

[3] Euthanasia which is a handy way to pay off the mortgage

[4] Incompetent practice

[5] Disclosure of proper secrets, whether learned from the Patient or the Grapevine.

I have delivered 600 mothers and successfully adopted out 30 babies.

I write as a doctor involved in discovering the Cures for two Fatal Infectious Diseases of Man viz Amoebic Meningitis in an Aboriginal boy from Mount Morgan one year after the New England Journal of Medicine described it as uniformly fatal and without hope of therapy; and AIDS - I discovered the first mutated chemokine receptor in a patient from Barcaldine as the result of a search for novel antigens...Mutated chemokine receptors are the basis of the only cure to date viz Timothy Brown in Berlin a few years ago.

Sincere doctors cure sometimes, alleviate often and comfort always.

Dr TB Lynch..
