Subject: Please OPPOSE Rob Pyn's evil Abortion Law Reform Ammdement Bill 2016
Date: Thursday, 30 June 2016 2:42:32 PM

Dear Members of the Committee of Enquiry

I urge the Committee to actively strongly recommend AGAINST Rob Pyne.s Abortion Law Amendment Bill 2016. This evil bill aims to make it even easier to destroy living human beings in Queensland, who up until safe birth have no legal defense, and no protection from a horrible and senseless death. Other States have found Abortion on Demand, for whatever reason with no restriction on gestational period increase, for reasons like sex-selection, and these abortions include late term, committing these living humane to abhorrent trauma and pain and suffering. It has to stop. This is becoming a Human Rights issue- The Bible tells us there is LIFE from conception so definitely means life being taken without consideration of these babies rights.

I believe as the Law stands, if a person deliberately injures a pregnant woman causing miscarriage, they can be charged with Manslaughter and Doctors and Nurses who perform these horrific acts are actually doing the same thing. Abortion Law in Queensland does need to be brought up to date but not by opening the floodgates for open slather on defenseless unborn babies. It would be fitting for the Politicians to consider upgrading ADOPTION LAWS to make it easier to have these "unwanted" babies find safe and secure homes where they can reach their God-given potential. Please report to reflect this and impress upon our MP's their obligation to protect these most vulnerable members of society. Yours Faithfully, Laurie Dimond
