---

congratulations on Queensland having abortion as a criminal offense. Please keep it that way. I have witnessed the destruction its causes in a womans life even years after one. Those who argue that it is a health issue are deceptive. It has been found where laws of this type are in existence that healthy women with a perfectly healthy baby have presented for termination.

Be aware that legislating this proposal into force will not make it legal because it will contravene a much higher authority than yours.

With respect

John Everingham
