Subject: abortion on demand bill
Date: Friday, 17 June 2016 7:49:37 PM

To our parliamentarians,

I strongly oppose the adoption of abortion availability, especially up to full term of pregnancy.

From talking with friends who have had abortions I understand there is serious physical and psychological long term effects on women after they have had abortions.

I believe women who are having difficulty coping with pregnancy should be given support and counselling, not just an option to abort. I believe this bill is dismissing overwhelming community opposition to changing the law; and fails to address the desperate plight of women who tragically see abortion as a solution.

Trusting you will vote on this bill understanding the feelings of the general populous.

Thank you for taking time to read this email,

Sharon Davis
