To Whom it may concern

I am absolutely disgusted that any abortions could be considered and allowed later than 6 weeks and should only take place if the fetus has obvious health or development issues

The mother will also usually suffer after having an abortion with serious psychological or mental issues and a huge feeling of guilt ensue because she has murdered her baby

These things are not even considered which is so wrong as I have personally had two abortions and know from my own experience. I could have benefited if I had been told of the consequences of my actions. It is a very serious matter and there needs to be help offered for the distressed mother to be. Awareness of this should be made by Medical people when consulted and advice of these options made available.

There are so many childless couples that would be so happy to adopt any unwanted babies and give them a very good life. Why is this option not given them for the benefit of all

Please stop this current push to legalize this very cruel and uncaring legislation

Sincerely

Aileen De Zaayer
