Please don't make it possible for doctors and nurses and pregnant women to kill a child right up to the point of birth. As a nurse I have spoken to other nurses and one RN was emotionally and psychologically affected by a fully formed child dying in her arms as it was aborted late term. Mothers are also affected psychologically deeply by a decision to abort it affects women for years after. Our society is thankfully sensitive to killing children, who has an advocate in our community, as we all, I trust are successful in staying any change in the legislation concerning abortion.

We need to support women who are pregnant and not treat them as one shunned because the engaged in intimacy knowing it could end by a baby coming. Support women with help while she is expecting instead of making a solution to "an unplanned pregnancy". The heinous crime if cold calculated murder. We are all meant to be here. As it stands if the mother's life is in danger then it is lawful I believe to have it terminated to save a life. Not that I particularly agree with that either. By we are here by the grace of God. Let Him Decide. We are taking on a pseudo morality if the law is changed. Please hear and be moved by your conscious not to make these changes.

Most sincerely yours  
Karen Cloherty
