Dear Parliament,

I wish to convey the opinion of myself, my husband, family, church and community in regards to decriminalising the current abortion laws in Queensland.

We extremely oppose this motion as we are of the belief that a child, whether invitro and at any stage in it's development in the womb is a human being from the date at which the heart starts beating. It is therefore in our belief a criminal offence to abort a child at any stage in it's development. Therefore we are strongly opposed to making it a law that a child can be aborted at late term or at any term in the pregnancy. It is not only for the unborn child that we are speaking up for but also for the mother's who later in life have to deal with depression surrounding the regret of their decision of abortion.

Yours sincerely
Jennifer Tweedale
