My thoughts on this just do it already and please get all other states and territory's to fall into line. I use to think this was an evil drug but as whole Cannabis is way better then just about every other drug out their and the research that has been conducted and the evidence that has been presented to me is being completely over looked obviously! Please don't use synthetic junk either if you are going to do it please allow access to the whole plant the real not the nightmare synthetic [REDACTED]
