I am a 66 year old woman with COPD - Emphysema and only just started using CO on the 05/06/16 to help with my condition, in the 2 1/2 weeks I have been using the treatment already I am able to breathe easier, I can now walk a decent distance without getting puffed and if I do get puffed it only takes a few seconds to get my breathing back to normal. I have actually stopped taking my medication as it was no longer necessary, so to be able to achieve all that in such a short time to me is incredible. I am beseeching you to listen to the community, the people of Qld and to speed up the legality of this product, which to me never should have been made illegal in the first place...the benefits of this natural God given plant are so far and wide, that for there to be even the slightest hesitation in fast forwarding this is beyond belief.

Yours sincerely,

[REDACTED]
