Legalisation of medicinal cannabis
Friday, 24 June 2016 3:17:56 PM

I totally believe in the healing abilities of this wonderful plant. I have used cannabis for the relief of migraines, anxiety and depression. Made into paste this miracle plant relieves all kinds of skin complaints and ailments such as rheumatoid arthritis, healing broken bones at great speed, eczema, psoriasis ingesting the cannabis oil can cure cancers, Alzheimer's, acquired hypothyroidism, Crohn's disease, glaucoma, fibromyalgia, major depression, mania, hepatitis C, insomnia, Lyme disease, multiple sclerosis (MS), Parkinson's disease, (PTSD), epilepsy, dravet syndrome, senile dementia, stuttering, shingles, traumatic brain injury to name but a few, Dr Tod Mikuriya has had successful results with medical cannabis on hundreds of diseases and ailments.

We have been lied to for decades about the "harm" of cannabis to our health, when the truth is the total opposite! We should be able to grow our own medicine - whole plant medicine, not a big pharma synthesised version!

The whole plant and nothing but the whole plant. It is time Australia woke up to the healing of this God given plant like the rest of the world!

FREE THE WEED!!!

Regards,
Margaux Dryland
