To whom this may concern.

I have smoked Cannabis everyday for 45 years. My A.D.D was only diagnosed 15 years ago. Yet my efforts to register my benefits directly to authorities has caused me major pain and persecution. I have curtailed my own angst and confusion that embodied representation is against Medicinal Natural Application available. This hysteria idolised by Big Pharma coffers dont want my evidence or insight regardless of its benefits. I challenge anyone who says Cannabis is Dangerous to race or out debate any rational used to Discriminate this herb. A sedative is required to curtail the Alcahole Anger Syndrome. Let alone the deaths prevented ?
