Re: A plea to look at this new proposed bill before it's too late

Dear QLD Health Committee,

Sex change operations are irreversible. The Qld government's new transgender law means that doctors will be forced to support their patient's request for a sex change, no matter how young or old the patient is.

If you support this law, you will be responsible for leaving countless boys and girls unable to ever have children. You will be responsible for countless women who will never be able to breastfeed.

The consequences of this bill are permanent and irreversible.

Please, reject this dangerous new law.

Sincerely,
David & Marilyn Rowsome

Dear Committee Secretary,

Please accept our submission concerning the Health Legislation Amendment Bill 2019 which, amongst many other things, seeks to ban the help which sincere and caring health service providers may wish to offer homosexuals and those who are confused about their gender.

Instead of protecting these poor people, as intended, this ban will actually cut off their access to the help they need, and in many cases are themselves seeking. It will also make criminals of those who are willing to offer genuine professional advice which is in the best interests of their patient.

Homosexuals and the gender confused should at least have the freedom to access help if they so desire, and others should have the freedom to help them if they wish.

This is why such a ban would be highly detrimental to our freedoms if enacted. We therefore urge you to recommend against this section (clause 28) of the Health Legislation Amendment Bill 2019.

Yours faithfully,

David and Marilyn Rowsome
