I have seen many more women harmed by abortion than helped by it as a doctor .it is too easy to get an abortion but the consequences last forever . Most of these women regret it sooner or later and many are subsequently infertile .very few women I've met as a doctor have regretted having their unplanned babies even when their lives have been turned upside down when they fell pregnant .this should never be an easy or rushed decision because the devastation is unremoveable . Women have been robbed and not empowered by abortion
