Women need to be informed more of what really happens it must be awful to have to go through the pain and guilt forever,Ive had four children in the early sixties and seventies and I often thought how on earth am I going to cope but we always seemed to manage,I had thought of abortion but could never go through with it it was much different then it was very illegal I was happy when the contraception pill was introduced. I'm sure its still available so I do not believe in abortion except a mother,s physical or mental health is in danger. Margaret.
