Dear Health Committee

Or should I refer to you as the Death Committee

These are the facts as below – no matter how much you twist the facts anyone who performs an induced abortion is a murderer regardless of what any government may think they have created as a law to overcome – at the very basic it is against the natural law.

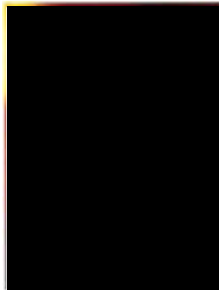

I run a cattle farm and I do not see the cows trampling to death their calves – maybe they are smarter than humans

An estimated **80,000 - 90,000** surgical abortions are performed in Australia each year. This equates to approximately 250 per day, or one abortion for every 2.8 live births. One in three Australian women will have an abortion in their lifetime

This year as of writing this email worldwide it is estimated to be 31,247,815 – you can watch the count on the website [REDACTED]

This pales in insignificance compared to the autocracies committed by say Starlin, Hiller, Moa Zedong.

I would suggest you watch the Video "The Silent Screams" before you vote on this bill, or have you not the courage to watch some foetus having their brains crushed.
