Dear Committee,

As someone who has friends and relatives who have given birth to happy, healthy children at between 27 and 32 weeks (and of course beyond) I cannot believe that you would consider terminating these children. We can call it termination and refer to them as foetuses, but that is just to help justify the fact that what is happening is murder to children!

Research is also overwhelming that the large majority of women who have abortions later suffer many psychological issues, as well as guilt and feeling self-shame. Why are we allowing them to be conned that killing their unborn child is going to be OK because the government decides to legalise it?

Please reject this bill.

Yours sincerely,
Karen Smith
