---

To the Honorable Queensland Parliament,

Please reject this dangerous widening of the abortion law. It is unnecessary and effectively legalizes murder of highly developed but unborn children. We do everything to keep babies born prematurely alive (considering them children), so how are they any less a person just because they are in the womb?

Please be wise and not simply listen to the cry of the loudest minority group while ignoring the silent cry of many unborn babies less this be on your conscience.

Respectfully,

Dr James Walker, MB, BS, FRANZCO
