To whom it may concern:

Please do NOT allow the bill supporting abortion to be passed.
Please do everything you can to stop abortion being legalised.

In my opinion, abortion is wrong and to change the laws to make it OK then redefines society's understood definition of 'life' and its value. By saying it is ok for a mother to choose to abort/murder her foetus/child/baby is taking society to a bottom level.

Approach the pregnancy 'problem' by being proactive instead of reactive (which is how I see abortion - where society treats the symptoms and not the real problem). If people are going to choose to have sex, then they choose the consequences of sex. Taking away people's right of responsibility for consequences of actions is to take away their freedom, to treat them like immature children. If they aren't mature enough to raise a child, then they aren't mature enough to have sex. Let's spend funding on training people to be better parents, to be more responsible, and as that filters through to the next generation, then there will be - oh I don't know why I am bothering to write this. I doubt someone will actually read this past the first couple of lines. so let me just restate - we need to fix the causes, not just the symptoms, of society's problems.

Say no to pro-abortion bills. never say yes to murder.
