To: [Abortion Bill](#)
Subject: re abortion
Date: Thursday, 29 September 2016 12:21:08 PM

to the QLD government /premier....
to the Australian government Canberra
and who ever it may concern

I guy cervera oppose by the present any bill that favor abortion as it is in fact murder and that even a 1 month old fetus is life and any destruction of it shall be consider as murder and those who so do it including practitioners should be prosecuted and jailed .

It also an abomination before God who will in fact be judged at the right time no matter what one decide to believe what pastor, official or Bishop pope none matter it is not what we say but what GOD has declared and still affirm in our day and each will pay in due course for judgment is at the door waiting.

What is the difference between a murderer who kill a human being or an unborn babe? one may say well he is not yet born how about if all of you politician where aborted? will this be a murder? or your own sons? will there be a difference? you may not like the example but it is not different actually we may not have such evil as we have today where good is called evil and evil is called good .

The world is worst than Sodom and Gomorrah where they bad? may be not as we are the problem was that

they first compromised then the sin grew and become in time exceedingly sinful and God had to judge it then. Are we better and will we escape the inescapable? NO and No we will all face judgment for me as for you the difference I will die once but then live other will die twice one of naturel death [if one make it with carrying his head under his arm how? we accept things we do not know about and call good and peaceful yet these peaceful only practice their true religion and I believe it is one off God's judgment to come upon the nation for their evil [we are all sinner you and I the difference I have been forgiven now sealed by the Spirit in Christ I may die yet I will live will you? can you say I never lust or stolen or lie ? no one can we where born as master sinners we only legally perfected our sin an d them legal and you think you will escape?, answer surely not .

since we are here may be we can talk about climate change [previously ice age to come or after this global warming yes we had to adjust but since we where unable to be right now we have climate change so what ever happen hot or cold it will fit in friend you are dead wrong but before we go into this know that the day will come here on earth when your are going to be terribly hot but that will be God.

now back to our talk do you know anything about Haarp and its weather modification possibility and control? then friends google it and then try Australia and Haarp nice title yes and think hard who is playing what music to your hears .will you escape ? may be if you are part of the elite but are you and so you will still pay for God will keep your account up to date and repay with interest.

Next check the iron mountain treaty video done in the late 70's as a result of a defection

the object all what we have today[global warming /ozone layer/ you see the problem it was purposed in the 50's then put on paper in the early 60's well before it was actually known by us in the 90's the actual plan is what we have today and is happening now whatever true or false as some say we can see from the original version which I can no longer find they are few but seem to have some edit .. how ever the original conform to what has happen in the last 10years or more. I have also seen documents of that and HAARP is an improve patent of n tesla of which someone had document obtained from the freedom of information and I barrow them other the weekend to access them and that was stunning over 1000 patents and copy of news paper of the time and being a technician but retired since 2009 after I broke my back for the 3td time and lost 4cm in height due to various compression .

in short do we have a problem? yes a great problem world wide and ready to come to a head,

We also have many lies about Israel to vilify them while we up the terrorist Palestinian forgetting what they where in the 50's what they did in Jordan [their origin] as they actually are from all Arab country even Yasser Arafat was Egyptian and is chief was an Algerian or Tunisian Arab but we forget and accuse Israel to occupy their own land while forgetting that the Palestinian did the same in Jordan and where expelled by the king of Jordan [forgot is name but very well know as is his son]. we also have rejected the truth and received a lie and somehow think she will be right well sorry I think she will get very sick even unto death.

By now you know that I am not young I have been here 43+yrs am Australian and love this country but we have sold our old ways for new one , we have become more and more greedy we allow things that should have never been , morality is now a by word in fact may be ban if we continue in our way and before we know may even become a Muslim nation having sharia law as part of England . our head is sick and need surgery but can avoid the unavoidable?.

Sorry my English and knowledge is not to good, well I am French and learned it just pick up a word there and there and then assembled them I also normally review my writing to correct omission for my mind is quicker than my hands but I have not enough time for that so please forgive me.

in conclusion I am definitely against abortions in my mind and morality it is wrong also if some get pregnant

it only because they did not take proper precautions and also because of fornication this was not in our days so each should take their responsibility before trying to put their ways on others we are all free to choose but the consequence we also should pay for them and not society. If one desire hell then be happy when it come you have asked for it by your own ways and choice but do not impose your ways on other .

we have enough from politicians who put us right with the UN and are we so sick that we cannot look after ourselves we where fully independent before now we are inter dependent [the wealthy dictate to us what to do the big Rothschildput us under their fingers the IMF the same..... very sick indeed, later you will cry with them but be happy you have chosen your way then imposed it upon us, so do not blame God but yourselves and be reassured I do not think we have 10yrs before thing get worst but yes someone

will take control and his helper a religious one will come first then you will have a short time before thing will go the way you did not imagine but you have made your as i did so be happy our time is coming soon and mine may be sooner .
may God bless you with all understanding , knowledge and wisdom of Him that you may make the right choice .
