To whom it may concern,

I wish to voice my opinion on the 'Health (Abortion Law Reform) Amendment Bill 2016'.

I DO NOT believe that abortion should be performed for any reason other than the mothers life in in danger. To say that it is ok due to 'risk to the mental health of a woman' is completely wrong (unless rape is involved).

We need to stand up for the right of the unborn child who is to come into this world. It is time that we recognised that if a person assumes they are ok to have sex then they need to be responsible for the possible outcome.

How dare we take away a life because of a 20 minute thrill. A baby can survive at 24 weeks. It is just too heinous to even think about.

I seriously hope you really think hard about this and look at the fact that this is not abortion but KILLING an innocent baby.
