To: [Abortion Bill](#)
Subject: New abortion laws
Date: Thursday, 29 September 2016 4:15:34 PM

I am writing to object to the abortion bill which would allow for abortion (death) of viable babies up to full -term. This horrifying bill will cause the killing of babies who would otherwise have lived. My grandson was two weeks premature and was born with no complications. He is now two years old. This infanticide should be classified as murder as the child is alive.

Women who are caught in this situation will also be put at high risk for future depression and debilitating regret. I know a woman who aborted her baby and to this day bitterly regrets her decision. She suffers emotionally as a result of her decision.

I implore the committee to listen to the cries of helpless babies rather than the demands of those who have no regard for the sanctity of life.

My name is Margaret Lynne Freudigmann
