Dear Health Committee,

I urge you to do the riight thing and oppose the current bill for changes to the abortion act! I strongly oppose any changes to this act as i believe taking a human life in any form is morally wrong and detrimental to the community of Queensland. Surely there are other ways around this issue of abortion. I propose extensive community programs and counselling to help those struggling with not 'wanting' or 'beleaving' they cannot look after the child. There are many different reasons behind someone wanting abortion but i believe we need to do everyrhing we can to help the mother in order to feel empowered, capable and responsible for playing a part in this little human beings existence!

Thank you for your time

Anthony Ryan
