---

To whom it may concern,

I am writing to express my deepest concern that the parliament will be debating this new abortion bill proposed by Cairns MP Rob Pyrne.

I am distressed that this bill goes against the good ethic morals of this state. It defies the rights of the new born baby. As a past nurse I walked out of an operating theatre when an abortion was being carried out. It is extremely distressing to know that a new viable life of a human being is being killed and that is what abortion is. Killing.

Even at 39 weeks the baby's physical development is complete, but he/she is still busy putting on fat he/she need to help regulate his/her body temperature in the outside world.

Please don't let our state be complicit to murdering our beautiful children.

Jan Steffan
