To the parliament of the Queensland government,

Life is a gift. I believe that Mp Rob Pyne is overstepping the boundary on a radical move to change the laws of abortion which not only will change the timing of an abortion in which it can be performed but also on free speech. We are free to peacefully protest in our streets and outside government buildings but not outside an abortion clinic? A 50 metre buffer zone on those buildings for protesters is an attack on free speech which is a bed rock of our countries history and law. I believe the current abortion laws are wrong, but to go further and change the definition of life from the small period of time in which an abortion can now be performed to full term of the pregnancy is just evidence that our changing morals and technology are destroying life that has been created. Governments worldwide are spending billions each year trying to find life in space on other planets and scientists consider life to be as small as an organism but we destroy the organism that is growing in the mothers womb. It isn't considered life until a certain period of time that has been set by a scientist or doctor but it is the miracle of life when a man and a woman create something that can bring so much joy. The mental issues that come with abortion are also being over looked because the mothers and fathers know that they have destroyed their child. I also believe that these new laws if passed they will be abused in the fact if the 2 doctors believe the mother won't be fit to be a parent or she can't afford to raise a child, they will abort not because it will have health issues for the mother but because of THEIR belief in what they think is what is right. I pray that the people we have put in power will do what is right for the sake of mental health of everyone that is directly affected by an abortion and the right to life when created.

Regards,

Cohen Crocker
