Subject: Vote down the amendments to the Abortion Bill.
Date: Saturday, 1 October 2016 6:34:05 PM

I was shocked when I heard of the extent to which the proposed changes to the abortion bill are being planned.

I remember when the original abortion bill was passed under the Bejelke-Petersen Government. Parts of the debate were based bad science,saying that there were no differences between the early stage fetus. And now we have lost the potential of having geniuses being educated in Australia, providing solutions to world problems.

The rights of a couple to post conception birth control stop when they engage in activities that are known to have a possibility of producing offspring.

Please do not allow any degradation to the abortion laws.

Yours Sincerely
Ralph Bartholomew
