

Dear Parliamentary Inquiry into Amended Abortion Bill,

I am a concerned member of the Queensland public. I would like to express my strong concern and dismay at Rob Pyne's second bill to legalise abortion.

A woman is in a very vulnerable position if she is pregnant and feels she has no support. It is a time ~~the~~ when as many options are discussed.

Rob Pyne's bill does not allow any other options to be discussed by ANYONE, which effectually shuts the door for other alternatives.

This is an attack on free speech, which even the doctors would have to comply with. Under the "safe zone" of 50 metres no moral or emotional support would be able to be offered. This is so wrong.

Queensland women of all ages deserve to have other alternatives besides abortion on offer. They need to have their mental, physical and emotional health protected and supported.

The current laws have strong public support and parents of girls under 16 deserve to have consultation with their parents before having an abortion. It is such a life-changing decision and should not be taken lightly.

Thank you very much for your time.

Mrs Tracey Hilton
