I wish to express my objection to this bill or any amendments to it as I believe this is the most devastation deception to the value of a human life. The child is a magnificent development of life and this starts at deception despite the lies that are told. If we can abort a child up to 24 weeks when it is quite well form , What value are we as humans, and what value do we put on children generally.

(A woman has her right over her own body) what unintelligent statement that is .She lost that when she decided to have Sex and a child was conceived, All I can see with this statement of a' woman having the right over her own body, is a person not willing to own their responsibility of being a mother or father( there might be an argument for medical reason however that is another issue)

The latter guilt affects on women is so devastating yet that is never considered and explained beforehand please take your heads out of the ground re: this bill. We will all have to deal with the results eventually.
