---

Good afternoon,

I object in the most strongest of terms all abortions and recommend this Bill be defeated in the House. I have Business in the USA and am appalled that since 1973 there have been over 53,000,000 abortions, that is more than double the Australian population, and denies all right to life of the child in the womb.

I notice Franklin Grahams comment and agree with it "God cannot bless a Nation that embraces the murder of innocent children". The Vice President aspirant Mike Pence also stated "Society is judged by how it defends its vulnerable".

Is it murder? Absolutely. We know life begins at conception, as the first stage of conception, called Zygote, contains human DNA unique to this life. When a heartbeat can be detected at 22 days how can anyone deny life has commenced. At 6 weeks parts of the new life have been formed, the eyes, the eyelids, nose, mouth and tongue. There is brain activity at 6 or 7 weeks and all organs and body parts are formed and at 10 weeks the child is moving. A new life is happening.

All abortion is wrong, never mind abortion/murder up to the day of birth.

Please reject this Bill accordingly.

Yours Faithfully,

Ken Page
