**To:** Health and Ambulance Services Committee  
**Subject:** [SPAM ?] Fwd: Vaccination Amendment Bill

**Importance:** Low

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

Dear Parliamentarians,

The Vaccine industry is the 14th biggest industry in the world. It is fairly obvious that through the revolving door of government and big business that senior executives of Big Pharmaceutical Companies and the Big Agricultural Chemical Companies produce the legislation by being employed by Governments or lobby governments to produce the legislation that supports these big businesses. In a lot of cases this legislation is not for the greater benefit of the public but for the greater profits of the Companies. This nepotism will lead to the continued decline of the environment and the public's health. Look at the TGA, how they target Natural Therapies and Health Food Companies and don't look at traditional allopathic Doctors or Pharmaceutical Companies, no matter how bad they are.

I ask how can toxic compounds like Thimerosal, a mercury based compound (with no safe limit), phenoxyethanol and aluminium salts in Vaccinations be good for new born babies' immune systems. Maybe they help initially develop some antigen's but what is the total impact on that Child's health from these toxic compounds, not to mention the potential recombinant DNA effects from cellular vaccines. These toxic compounds while small would still add to the toxic levels of the Child and when the toxic threshold is reached, illness will result.

I have met a Autistic Child whose carer told me he was perfectly normal before getting vaccinated. Please also refer to the CDC Whistleblower article in the link below.

It is sanitation and dietary improvements that has predominantly improved the health of the public for which Pharmaceutical Companies take the Credit. However, the toxins from the Chemical, Agricultural and Pharmaceutical companies have created a lot of the illnesses that predominate today and for which Big Pharma benefits. Illnesses that were not prevalent before the occurrence of these chemicals and pesticides.

Please explain after reading all the articles below that Vaccines are good for you and that the whole industry is not rigged.
