The **MMR vaccine:** Open letter to Australian PM Anthony Abbott
<https://www.pm.gov.au/contact-your-pm>

Hon. PM Anthony Abbott,

As we all know, earlier this year you decided that Australian families must vaccinate their children, or else lose government benefits.

And then you also decided that all vaccine exemptions would be cancelled ... except the rare medical one.

Well, PM, something just happened in Washington DC that leaves you hanging out on a very dangerous limb ... unless you can suppress all mention of it in the Australian press.

US Congressman Bill Posey, speaking on the House floor (July 29), read a statement from a senior scientist at the Centres for Disease Control (CDC).

The scientist's name is William Thompson, and he is a whistle blower.

In 2004, Thompson and several other CDC scientists authored a study on the MMR vaccine, and its potential connection to autism.

The study was published in the journal Paediatrics.

The MMR vaccine is mandated for children in Australia, as you know, PM.

The CDC study claimed there was no sign that the MMR (measles-mumps-rubella) vaccine was dangerous.

But Congressman Posey read a shocking statement from whistle blower Thompson (July 29) to the Congress, in which Thompson confesses to a lie. **A gigantic lie!**

Thompson admits he and his colleagues **cooked the data**, in order to exonerate the vaccine, which otherwise would be seen to have a significant connection to autism.

They lied. They covered up the reality.

Here are Thompson's own explosive words:

"...the [CDC] co-authors scheduled a meeting to destroy documents related to the [MMR vaccine] study.

The remaining four co-authors all met and brought a big garbage can into the meeting room and reviewed and went through all the hard copy documents that we had thought we should discard and put them in a huge garbage can." (William Thompson, CDC researcher)

Do you get that, PM?

The co-authors of the study threw out vital data into a garbage can.

And this is called science.

In other words, PM, if these CDC authors had published the truth in 2004, if they hadn't cooked the books, if they hadn't thrown away vital documents in the garbage, everybody

would know the MMR vaccine has a connection to causing autism.

And now the MMR vaccine is mandatory in Australia.

Parents are ordered by you, PM,

by your government, to have their children shot up with the MMR.

The word *liability* comes to mind, PM. Extraordinary liability.

Let me give you another piece of information.

Two of Thompson's co-authors on the 2004 MMR study, Coleen Boyle and Frank DeStephano, are also high-ranking executives at the CDC.

Guess what arena they work in? Vaccine safety. Yes.

So that means every single study on the safety of any vaccine, conducted during their tenure, now falls under a heavy cloud of suspicion.

Think about that one, PM.

Here are a few more words from CDC whistleblower Thompson. Congressman Posey read these as well, out in the open, to the Congress, on July 29:

“However, because I [Thompson] assumed it [destroying the documents] was illegal and would violate both FOIA and DOJ requests,

I kept hard copies of all documents in my office and I retained all associated computer files.

I believe we intentionally withheld controversial findings from the final draft of the Paediatrics paper.”

Yes. So Thompson still has, in his possession, the truth about the MMR vaccine-autism connection.

So does Congressman Posey. So I believe, do a few other people.

But again, PM, you mandated the MMR for all children in Australia.

How many children are you therefore endangering?

And if the Australian people wake up, do you think they might throw you-your lot out of office?

Denial is your best weapon ... don't mean denial of knowledge about what is exposed in this article.

I mean denial that CDC whistle blower or Congressman Posey are saying anything meaningful. That's the usual PR strategy, isn't it?

Reduce the debate to a he-said he said standoff ... then side with the “experts” at the CDC, who will claim this is a “misunderstanding” and a tempest in a teapot.

Of course they will. Their careers are at stake.

But answer me this, PM. When was the last time you heard of a group of government researchers doing “nothing of significance,”

when they had to throw vital documents into a garbage can?

Millions of children's lives and health are at stake here, PM.

Shall I assume you'll simply tap dance around this and dismiss it with a wave of your hand?

Will you try to con the population of Australia?

Will you even address the scandal-danger?

Or will you ignore it?

If you ignore it, everything depends how submissive-obedient-asleep Australians are.

You can never tell. Strange things can happen.

Suppose the mothers of Australia suddenly see the handwriting on the wall?

Suppose they realize the future of their children depends on a roll of the dice with a vaccine that can create severe neurological damage?

What might they do?

How would they feel ... knowing you are ordering them ... commanding them to give their children the MMR shot?

Just what is your hidden agenda PM !
