Dear Mr. Newman,

Your government seems determined to wreak havoc wherever possible.

Now it wants to allow development in the form of resorts in our and I emphasise OUR national parks. Queensland has precious little land set aside for these parks that are supposed to protect wildlife, biodiversity (which keeps us all alive), and let people come in who have nothing but money on their minds. Much will be destroyed in the building and in the visitors who always have adverse effects on the bush.

Please speak out against this development as well as allowing horses, trail bikes into National Parks.

Dereka Ogden
