Subject: Proposed Amendments to the Nature Conservation Act 1992

To Whom it May Concern

I do not support private leases being authorised for ecotourism facilities in National Parks in general, and consequently do not support the proposed amendments to the Nature Conservation Act 1992.

In addition I would like to express my concern that the matter is being considered by the Health and Community Services Committee rather than the Agriculture, Resources and Environment Committee. The latter committee would seem to be a much more appropriate committee to consider the environmental issues involved.

Regards
