Subject: Nature Conservation and Other Legislation Amendment Bill 2012

Dear Committee,

I strongly oppose this bill on the grounds that only 5% of QLD is put aside for protection of our native flora and fauna in undisturbed areas and there is absolutely NO good reason to encroach into this tiny 5% to develop. While I see that it would be inviting "Eco-Tourism Resorts" to be built, it is still a very bad idea to develop inside our national parks. Please do not let this bill go forward, it would be a terrible mistake.

Thank you,

Rachel Mebberson
