Subject: commercial tourist development in national parks

I object to any commercial development in national parks, "eco-tourism" or otherwise, this would be a massive step backward. This land was set aside for national parks because of the environmental damage e.g. land degradation, loss of species, plus threat to surviving species of plants & animals, which has already occurred, in an effort to save the environment & ensure the survival of the ecosystems that currently exist. Such a move as that proposed, would take us back a hundred years in our environmental policies.

If this government continues with policies so hostile to the environment, they will more than likely lose the federal election for the LNP in 2013. A lot of voters who I know, who previously were saying they were voting LNP at the federal election are changing their minds due to some of the proposed policy changes & those already put in place by this current state government. I am considering changing my vote myself.
