---

This email is to wholeheartedly object to your proposed bill to exclude unvaccinated children from ChildCare. If parents choose to vaccinate their children, they do so in the belief that it will protect their children from disease. Therefore, it should not matter how many unvaccinated children are around them. They have immunity. If they don't, then what was the point of the vaccination?

Many parents are looking at the evidence that vaccinations do not work, have dangerous side effects and, particularly, when combined with other vaccines can cause serious defects and even death. These parents have done their homework, which, apparently you have not, and are unwilling to poison their children. My own children, now adults, were not vaccinated and all 4 of them were healthy and vibrant through out childhood (and now) and have developed healthy immune systems. Not like many of their friends and peers who were vaccinated and still managed to pick up every bug going around - compromised immune systems????

The fact that you are trying to make it compulsory points out that there are flaws in the system, that vaccinations don't work and that the drug industry is desperate to hide its defects.

**FOR THE SAKE OF OUR CHILDREN, FIND THE UNBIASED RESEARCH WHERE DRUG COMPANIES AND THEIR PAID HIRELINGS DON'T RESEARCH THEIR OWN DRUGS AND GIVE RESULTS THAT WILL EARN THEM EVEN MORE MONEY.**

Just as a starter to get you open to the possibilities:

Every child has the right to participate in Childcare. EVERY CHILD!

In Love and Light
