Subject: Public Health (Exclusion of Unvaccinated Children from Child Care) Amendment Bill 2013
Date: Monday, 1 July 2013 11:22:03 AM

Hi,

My name is Petra Kralovic and I am a mother of two beautiful healthy children. Me and my husband have been through extensive research on vaccination and after speaking to various doctors and natural therapist and other parents we have made a decision not to vaccinate our children. We are educated people with degrees with European background and we have decided to live in this country and proudly become Austrians because this country does not discriminate and gives us freedom of choice.

As parents we have a major responsibility for the well-being of our children not only for their health and many times we have to make difficult decisions. The role of the government is provide information and support to parents so they can make the best decisions based on fact not fear and threat.

If Mrs Jo-Ann Miller believes this Bill is going to make parents vaccinate she is wrong. It is going to discriminate first of all. There are children who can't get fully vaccinated for example because of being allergic to the substances in the vaccines. Are they going to be refused to attend daycare and kindergarten?

My next question is....Is government ready to compensate families for the potential side effects from vaccination?

As a mother and Australian citizen I ask you to refuse this Bill because it discriminates and takes away my basic right of freedom of choice.

Thank you.

Petra Kralovic
